

A Life Transformed—Mentok's Miracle

MEDSEND Spotlight Partner Update

At just two years old, Mentok's life took a tragic turn when she fell into a vat of boiling stew in her remote South Asian village. With 40% of her body burned and in septic shock, her survival seemed impossible. Cultural stigma and lack of medical access nearly sealed her fate—until God intervened through MedSend-supported healthcare worker DB*.

When DB learned of Mentok's situation, she fought tirelessly for her care. From advocating for life-saving treatment to organizing a global team of believers, doctors, and donors, she ensured Mentok received the care she desperately needed. Through prayer and miraculous healing, Mentok's skin grafts took, her infections cleared, and her legs were saved.

Because of your generosity, DB was there when Mentok needed her most. Today, after months of surgeries and rehabilitation, this brave little girl is walking again—something doctors once thought impossible.

Mentok's story is one of strength, faith, and the life-changing power of compassionate healthcare. We'd love for you to watch this special video and see how God is working through medical missions to bring hope and healing. *Name changed for security reasons

PRAYER REQUESTS

1. Pray for Mentok's Continued Healing and Future – Ask for God's continued healing over Mentok's body as she grows, that her skin grafts remain strong, and that she faces no further complications. Pray also for her emotional and spiritual well-being, that she would experience God's love and protection in her life.
2. Pray for Strength and Encouragement for DB – Lift up DB as she continues her work serving in a challenging environment. Pray for wisdom, endurance, and protection as she provides medical care and shares Christ's love with those in desperate need. Ask that God would sustain her faith and provide the resources she needs to continue this life-saving work.
